Title: Vision Board

Grade Level: K-5

Objective: Students will use illustration and collage to create a vision board demonstrating their short & long-term personal goals.

Lesson Plan

Materials: index cards, pencils, magazines, colored pencils, markers, posterboard or 11 x 17 paper, scissors, glue sticks, paper bags

Opening Activity: The NEW SCHOOL YEAR is a great time to start fresh with a new set of goals for ourselves. Ask members to think of 3 goals they want to achieve, and why those goals are important to them- choose some students to share 1 of those goals and ask them why it's important to them. Let them know they will be making vision boards, and to keep those goals in mind so they can create the vision board to help them visualize and prepare to achieve those goals.

Core Activity:

- Distribute paper bags and markers, have members write their name on their bag
- Distribute magazines & scissors, have students rip out the images and text they want to use and put their cutouts in their bag.
- Once members have had at least 10 minutes to find their pictures, collect the magazines and clean up the unused scraps- set these aside, they may be needed later!
- Distribute posterboard or 11 x 17 paper, glue stick and colored pencils/markers.
- Let the members work for the remainder of the class time as they piece their vision boards together.

Reflection: As members clean up the space, invite them to share about their vision board. You can encourage them to keep them in the club and hang them up in a vision board gallery, or they can take them home.
