

## Title: Vision Board

### Grade Level: K-5

**Objective:** Students will use illustration and collage to create a vision board demonstrating their short-term & long-term personal goals.

## Lesson Plan

**Materials:** pencils, magazines, colored pencils, markers, posterboard or cardstock or watercolor paper, scissors, glue.

**Opening Activity:** The NEW YEAR is a great time to make resolutions, but we set goals for ourselves ALL THE TIME. Ask members to think of 2-3 goals they want to achieve, and why those goals are important to them- choose some students to share 1 of those goals and ask them why it's important to them. Ask them if these goals are SHORT TERM goals or LONG TERM goals.

### Core Activity:

- Students are going to CREATE a work of art to reflect their short term and long term goals. Distribute paper and pencils and have them write down 2-3 SHORT TERM and 2-3 LONG TERM GOALS they want to work on.
- Distribute the magazines & scissors and instruct students to cut out images or words that reflect their goals.
- When members are ready to make their collage, distribute card stock or watercolor paper & glue. Have them COVER the page with their collage.
- Distribute construction paper and pencils, have members TRACE OUT the number "2024" and then CUT THEM OUT to glue OVER the collage.

**Reflection:** As members help clean up the space, encourage students to show and describe their vision board, and call on 3 students to give a supportive acknowledgement of their artistic vision. Create a VISION BOARD GALLERY in your room by hanging up the finished or unfinished vision boards. Students can continue to work on developing their vision board throughout the season as an activity when they've finished their homework.
